## EXPERIENCE

- **Blacksoil Capital** Gurugram  
*Software Engineer (Full-time)* August 2024 – Present
  - **Workplace Management System (Web – React, Ant Design, React Query):** Designed and delivered a centralized workplace management platform reducing manual workflows by **40%**. Implemented Role-Based Access Control (RBAC) that improved system security and reduced unauthorized access attempts by **90%**. Developed 6+ core modules (employee, organization, bank, asset, approvals) with an intuitive Ant Design UI, increasing adoption across **100% of employees** in the first month. Leveraged React Query for efficient caching, cutting API response latency by **30%**.
  - **SaralSCF Borrower App (Mobile – React Native + Expo):** Built and launched a borrower-facing app for NBFC clients, enabling users to manage credit, upload invoices, and initiate payments—digitizing processes that reduced TAT (Turnaround Time) by **35%**. Added multilingual i18n support, expanding accessibility to both **Hindi & English** users. Integrated Zod + React Hook Form validation, lowering input errors by **25%**. Created a scalable theming system using design tokens, ensuring consistent UI across **100+ screens**.
- **Ishaare LLC** Noida  
*Software Engineer (Contractual)* Feb 2024 – May 2024
  - **Matrimonial Platform (Web – Next.js + Tailwind CSS + Redux + WebSockets):** Led the end-to-end frontend development of the matrimonial platform, onboarding **500+ active users** in beta. Built a real-time chat system with photo-sharing, increasing user engagement by **60%**. Optimized Redux state handling to reduce redundant API calls by **40%**, improving overall page load speed. Integrated WebSocket-based updates, resulting in **zero-lag** chat delivery for 95% of user interactions.
- **Deloitte USI** Gurugram  
*Technology Analyst (Full-time)* June 2022 – Jan 2024
  - **DNS Query Portal (Web – ReactJS):** Developed an enterprise DNS Query portal in ReactJS, enabling users to query and edit domains within the client's DNS service. Built interactive list and pie-chart visualizations, improving data readability and insights for DNS operations. Delivered CRUD and bulk-edit workflows on DNS records, cutting manual update efforts by **35%** and boosting efficiency. Implemented a global search component across record types, properties, and keywords reducing search time by **40%**. Designed a responsive dashboard with actionable insights, improving visibility into DNS health across **20+ domains**.

## PROJECTS

- **SKETCH APP:** Designed and built a drawing pad application with Next.js and the Redux Toolkit library. Implemented draw and eraser features using the Canvas API, enabling users to undo and redo operations, as well as customize pencil color and brush size. Integrated socket functionality to emit and capture drawing patterns, enhancing the collaborative experience by allowing users to observe others drawing on their shared board.
- **CINE-PARTNER:** Developed Web application with ReactJS, Tailwind CSS, API Integration, React Router, Custom Hooks and Responsive Design. It utilizes the TMDb API to fetch real-time data. Movie information is presented through interactive cards. Users can click on a movie card to view additional details.

## EDUCATION

- **Jaypee Institute of Information Technology** Noida  
*Bachelor of Technology - Computer Science; CGPA: 8.6/10* July 2018 - June 2022
- **St. Patrick's School** Jodhpur  
*CBSE Class XII - 81.6/100, Class X - 9.4/10*
